

BUDDHA INSTITUTE OF TECHNOLOGY

DEPARTMENT OF COMPUTER SCIENCE AND INFORMATION TECHNOLOGY

ACADEMIC YEAR 2025-26

GUEST LECTURE

An **Industry Guest Lecture** was organized for the **3rd year students of B.Tech Computer Science & Information Technology** at **Buddha Institute of Technology, Gida, Gorakhpur** to provide valuable industry exposure and placement guidance.

The session was delivered by **Mr. Anuj Agrawal**, who shared his professional insights on the topic **“Expectations of Leading IT Companies in Placements and Strategies for Success.”**

During the lecture, **Mr. Anuj Agrawal, Engineer Leader from Seattle, USA**, discussed the **expectations of leading IT companies from fresh graduates**, highlighting the importance of **strong programming fundamentals, problem-solving skills, data structures and algorithms, communication skills, and teamwork**.

He also guided students on **effective strategies to succeed in campus placements**, including **building strong technical knowledge, developing practical projects, practicing coding regularly, preparing for technical interviews, and maintaining a professional attitude**. He emphasized that **continuous learning, adaptability, and real-world problem-solving abilities** are key factors that differentiate successful candidates in the competitive IT industry.

The session proved to be **highly interactive and insightful**, motivating students to start **early preparation for placements and focus on developing both technical and soft skills** required by top IT companies.

The lecture concluded with an **interactive question-and-answer session**, where students discussed **career opportunities, industry trends, and placement preparation strategies** with **Mr. Anuj Agrawal**
